

# ECIH

**EC-Council**

Duration: 24 hours \ 3 days

# About The Course

## EC-Council Certified Incident Handler

This course is designed to provide basic skills to deal with and respond to computer security incidents in the information system and to review various principles and techniques essential to detect and respond to current and emerging computer security threats.

How to deal with different types of accidents, risk assessment methodologies, and different laws and policies related to incident handling.

# Course Outline

**Module 01:**  
Introduction to  
Incident  
Handling and  
Response

**Module 02:**  
Incident  
Handling and  
Response  
Process

**Module 03:**  
Forensic  
Readiness and  
First  
Response

**Module 04:**  
Handling and  
Responding to  
Malware  
Incidents

**Module 05:**  
Handling and  
Responding to  
Email Security  
Incidents

**Module 06:**  
Handling and  
Responding to  
Network  
Security  
Incidents

**Module 07:**  
Handling and  
Responding to  
Web Application  
Security  
Incidents

**Module 08:**  
Handling and  
Responding to  
Cloud Security  
Incidents

**Module 09:**  
Handling and  
Responding  
to Insider  
Threats

# Course Add Value

Know the basics of accident management including accident signs and costs and the basics of vulnerability management, threat assessment and risk management.

Understand the importance of conducting the first response including evidence collection, packaging, transportation, storage, data acquisition, volatile and static evidence collection, and evidence analysis.

Decode the various steps involved in planning and responding to an incident handling program.

How to combat different types of cybersecurity threats, attack vectors, and actors and threats that motivate them.

Apply the correct technologies to different types of cyber security incidents in a systematic way.

Understanding the basics of computer forensics and criminal preparedness.

# Course >>> Prerequisite

There are no prerequisites to take the ECIH course.
