

CCSK[™]

Certificate of
Cloud Security Knowledge V5

About The Course

The CCSK Foundation course helps you to deep learn and starts with the fundamentals, then increases in complexity as it works through all 12 domains of the CSA Security Guidance, recommendations from the European Union Agency for Network & Information Security (ENISA), and an overview of the Cloud Controls Matrix.

Duration

24 hours / 3 days

Course outline

DOMAIN 1
Cloud
Computing
Concepts and
Architectures

DOMAIN 2
Cloud
Governance
and Strategies

DOMAIN 3
Risk, Audit
and Compliance

DOMAIN 4
Organization
Management

DOMAIN 5
Identity
and Access
Management

DOMAIN 6
Security
Monitoring

Course outline

DOMAIN 7

Infrastructure
and
Networking

DOMAIN 8

Cloud Workload
Security

DOMAIN 9

Data
Security

DOMAIN 10

Application
Security

DOMAIN 11

Incident
Response
and
Resilience

DOMAIN 12

Related
Technologies
and Strategies

Course Add Value

Learning how to prove your efficiency in key cloud security issues through an organization that specializes in cloud research.

Complement other credentials such as the CISA, CISSP, and CCSP.

learn how to Demonstrate, identify your technical knowledge, skills, and abilities to effectively use controls tailored to the cloud.

Increasing employment opportunities by filling the skills gap for cloud-certified professionals.

Learn to establish a baseline of security best practices when dealing with a broad array of responsibilities, from cloud governance to configuring technical security controls.

Course Prerequisite

Have a deep basic knowledge in Network and web technology.
